

2 September 1964

Mr. Charles E. Olson, Jr.  
Department of Forestry  
School of Natural Resources  
The University of Michigan  
Ann Arbor, Michigan 48104

Dear Chuck:

At long last I would offer a few nominees for the ASP PI Awards. Although the bulk of the ASP technical literature is in those specialized sciences which are components of the art of photo interpretation, the papers named below were selected for being among the best in those fields which have direct or indirect impact on the photo interpretation process. They are:

- a. Color and False-Color Films for Aerial Photography - Tarkington & Sorem - Photogrammetric Engineering, Jan. 1963, p. 88.
- b. Accuracy and Precision in Photogrammetry - Hallert - Photogrammetric Engineering - Jan. 1963, p. 108
- c. To Measure is to Know - Colwell - Photogrammetric Engineering, Jan. 1963, p. 71
- d. Descriptions and Airphoto Characteristics of Desert Landforms - Davis and Neal, Photogrammetric Engineering, July 1963, p. 621.
- e. Comparison of Panoramic and Serial Frame Camera Systems for High-Speed, Low Altitude Reconnaissance - Goldhammer and Edwards - Photographic Science and Engineering - Vo. 7, No. 1. Jan-Feb 1963, page 53

I hope that these names may be added to your list, subjected to your frequency precedence regrouping, and then fed back to the Committee members for final voting by 1 December 1964.

STAT

I hope that you are able to get to the ISP Meetings in Lisbon as it should be a most interesting session with good U.S. and foreign attendance. I don't expect to make it, but some of my fine assistants like [redacted] will be there. Give a hearty greeting to Randy for me and please give me a call whenever either of you gets into Washington.

Cheerio,

Art Lundahl
